SUMMARY

B.Tech student in Computer Science & Engineering at KNIPSS, Sultanpur, with experience as a Java Web Developer Intern at SAS Software Solutions. Developed an Invoice Generation API using Java Spring Boot. Key projects include a MERN Stack Event Management System, a responsive E-commerce platform, and a personalized portfolio website showcasing technical skills and innovation. Proficient in Java, Spring Boot, React, Node.js, and Express.js.

EDUCATION

Kamla Nehru Institute of Physical and Social Sciences
Bachelor's Of Technology, CSE
2021 – 2025

Kamla Nehru Institute of Child Education
Senior Secondary School
2020-2021 (95%)

SKILLS

- Strong organizational and time-management skills
- Exceptional communication and interpersonal skills
- Ability to work independently and as part of a team
- Detail-oriented and able to handle multiple tasks simultaneously
- Proficient in React, Node.js, and Express.js, HTML, CSS, JavaScript, and Tailwind CSS
- Experienced in Java, Spring Boot.
- Knowledgeable in MongoDB and MySQL
- Familiar with version control using Git and GitHub

PROFESSIONAL EXPERIENCE

Java Full Stack Trainee
Jspider-Bangalore (April(2024)-Current)

- Comprehensive Learning: Gaining hands-on experience in both front-end (HTML, CSS, JavaScript, React) and back-end (Java, Spring Boot) technologies to build full-stack applications.
- Database Management: Learning how to design, develop, and manage databases using SQL and integrating them into web applications.
- Project-Based Approach: Working on real-world projects to implement concepts such as RESTful APIs, microservices, and responsive web design.
- Industry-Relevant Skills: Enhancing problem-solving abilities and mastering tools like Git, Maven, and Docker for efficient development and deployment processes.

Java Web Developer Intern
SAS pvt. ltd. | 2022 - 2023

- Developed an Invoice Generation API using Java Spring Boot, enabling the generation of invoices for both customers and businesses, with functionality for PDF downloads.
- Collaborated with a team to ensure seamless integration of the API with existing systems, enhancing operational efficiency.
- Gained hands-on experience in backend development and API design, contributing to improved client services.

ACADEMIC PROJECTS

Event'O – MERN Stack College Event Management System
GitHub | Project Link

- Developed a full-stack web application utilizing ReactJS, NodeJS, Tailwind CSS, and MongoDB
- Designed distinct interfaces for administrators and students to streamline event management for educational institutions
- Implemented features such as event creation, registration, and management
- Utilized React Router for seamless navigation and Axios for API communication
- Styled the application using Tailwind CSS for a responsive and visually appealing UI

The Coding Scribe – MERN Stack Blog Website
GitHub | Project Link

- Spearheaded the end-to-end development of a dynamic and user-friendly blog website
- Utilized ReactJS, NodeJS, Express, and MongoDB for the full-stack implementation
- Designed an intuitive and visually appealing frontend interface using Jodit Editor
- Implemented features such as blog creation, editing, and commenting
- Utilized React Router for navigation and Axios for API communication
- Styled the application using Tailwind CSS for a responsive and consistent UI
- Deployed the backend on Glitch and the frontend on Netlify for easy access

Portfolio Website
GitHub | Project Link

- Developed a personalized portfolio website using React, CSS, and Figma
- Showcased skills, projects, and professional background in an engaging manner
- Utilized React Router for navigation and Framer Motion for smooth animations
- Designed the website using Figma for a visually appealing and responsive layout
- Deployed the website on Netlify to establish an online presence and highlight technical proficiency
